### SKID DESIGN

**WARRANTY** North Mountain Structures LLC offers a 6 year\* limited warranty from date of purchase to original owner. This warranty covers any defects in material and workmanship and the same will be repaired or replaced at our discretion. This warranty is only effective if building is maintained in its original constructed condition. This warranty does not cover normal wear and tear, acts of God, and is null and void if building has been placed on an improper foundation. Please see sales rep for a Full Warranty Details.

*\*Economy Series is only covered for one year.*

### Site Prep & Delivery Recommendations

Our customers are responsible to have a level stone pad for setting their shed on. We recommend that you remove the grass sod and fill with 4–5" of  $\frac{3}{4}$ " crushed limestone. We highly recommend making the pad 2' larger than the size of your shed so there is adequate drainage for roof water runoff. The building will arrive on a trailer towed by

a 4x4 flatbed truck that will have a total combined length of approximately 50'. Your access area will need to be approximately 2' wider than the building and should have 14' of clearance height. Please discuss any questions you may have with one of our sales personnel for more details or for options in limited access areas.

Start your project and design  
your own building on our website.
